

SINGLE FUNCTION MANIPULATOR & ROPE CUTTER

Closed

Opening

Fully Open

The single function manipulator has three, 4"/100mm stainless steel jaws enabling vertical or horizontal objects to be grasped. It is particularly useful for deploying equipment, light recovery tasks or attaching a line.

*Closed with
cutter blade covered*

*Opening exposes the blade
and traps the rope...*

To make the cut

This tool can also be used to cut 3/8"/10mm diameter rope with the simple installation of a craft or 'Stanley Knife' blade that remains fully protected while the jaws are closed.
